

To All Our Friends in the Wine Industry

With 2004 behind us, we prepare to focus on a new year. As we monitor our Malo-Lactic fermentations, and consider some possible fining treatments, we would like to summarize some of our easy to use products:

- **Biolact ML** - We still have a limited supply of fresh direct add ML culture and ML nutrients should any of your tanks need a little boost.
- **Gelsol** - A liquid form of pork derived gelatin as an alternative to granular form. Because Gelsol is a highly concentrated solution, shelf-life is never a problem.
- **Ovogel** - 100% pure powdered egg albumin as an alternative to egg whites. Storage and consistency is no longer a problem.
- **Lysocid** - 100% Lysozyme to inhibit bacteria.
- **Bentogran** – Reduce the total quantity of bentonite you need by using this pure pharmaceutical grade of bentonite.
- **Spindasol** – Colloidal Silica Sol for rapid settling.
- **Catalasi** - A potassium casienate based anti-oxidant clarifier.
- **Divergan HM** - A new form of PVPP designed to remove copper and other heavy metals

Our trained staff is always on hand to answer any questions you may have regarding these products. If you would like to learn more about what these products can do for you, please contact us and we would be happy to do a product demonstration on a sample of your own wine.

This time of year is also means filtration, and when it comes to filtration, Padovan is an industry leader. We mentioned Taylo and Taylo-Lux Rotary drum vacuum filters in our last newsletter. For DE filtration it's Greentop and Greenfilter Pressure Leaf. When it comes to pad filtration it's Master Light or Master Inox. Visit our booth **P2** at the Unified Symposium in Sacramento to see the latest version of **Cross Flow** technology and discover the **Vacuum Press**, which is revolutionizing the way wine makers view presses.

With all the products we represent, we pride ourselves on the technical support offered by the ATP staff in assisting our customers to obtain the best possible results from the use of our products. We look to be more than just a supplier and prefer to be considered your "partner". Let us show you what we can do for you.
