

January-2007 Equipment Newsletter

**ORDER SOON
FOR CRUSH 2007**

Winemaking involves many steps from vine to wine and American Tartaric Products is here to help in all aspects including crush pad equipment. From crusher-destemmers to pumps & presses we can handle all your needs for the smallest winery to the largest, we have every size available. American Tartaric Products is also one of the few companies that employs cellar masters, winemakers and engineers as sales representatives to assure that you get what you need from people that have "been there and done that".

De-Juicer

Continuous de-juicing of musts to ensure efficient use of pressing equipment and separation of free run juices to maintain quality. Available from 600-800 hL/hr

Crusher-Destemmers & Must Pumps

All stainless steel construction with variable speed drives in various combinations to suit your specific needs including optional plastic & variable diameter cages. Available from 5-65 tons/hr

Vacuum Press (patented technology)

This technology extracts must of the highest quality. Though similar in appearance to traditional pneumatic presses it enables instant separation of the must during the loading phase and operates at very low pressure (0.7-0.9 bar). Inert gas blanketing for whites and very minimal air requirements set this unit apart from what is otherwise available. Available from 35-500 hL/hr

Pneumatic Press

All are fully programmable and PLC controlled with several door configurations available. Siprem offers a unique washing system that is extremely effective when compared to other air/water pulse systems. Available from 6.5-450 hL/hr

For more information on these and your other equipment needs please contact your local Equipment Specialist:

January-2007 Equipment Newsletter

una pressatura soffice per vini di qualità

Siprem Vacuum Presses are used worldwide to extract must of the highest quality. Several units are in operation here on the West Coast. Please call for more information or to arrange a visit to see units at our Windsor warehouse. These are possibly the most gentle presses available.

Milani Hercules Basket Presses. Extremely sturdy and easy to operate, fully PLC controlled with 10 available user programs to optimise each and every phase of the pressing cycle. Two models available, Hercules 10 (8 hl) & Hercules 15 (18 hl)
